Art Unit: 3679

*Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to driveline, classified in class 464, subclass 178.
  - II. Claims 10-15, drawn to a bracket, classified in class 248, subclass 200+.
  - III. Claims 16-19, drawn to a method of decreasing weight in a driveline, classified in class 29, subclass 428+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination doesn't require a bracket with a composite upper portion and a lower portion. The subcombination has separate utility such as bracket for a pipe coupling.
3. Inventions III and I/II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the

Art Unit: 3679

product as claimed can be made by another and materially different process because it does not necessarily have to be made so that it includes a heart distortion temperature of at least 180 degrees Celsius.

4. Because these inventions are distinct for the reasons given above and the search required for any one of the inventions is not required for any of the other inventions, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Binda whose telephone number is (703) 305-2869. The examiner can
